I love me some swamps and trolls. I always found them bogs mesmerizing, bumped into these while being a little bit lost in the forest with my friend a couple of times. Thatu2665u2665u2665u2665u2665s even creepier in real life, even during daytime and without them monsters. But, sadly, even a swamp can't salvage this gameplay, which exhausted me in less than an hour. Basically, you tediously run around collecting stuff to move the plot, sometimes things happen, just like in that slenderman trash. The things themselves are okay, Swedish folklore is much better than them spooky urban memes, and the price is real low, but none of it could justify the slog to me.. This game. damn this game and it's jump scares. A really good short game and gets you jumping most of the time. A lot of crazy stuff happens during your gameplay and it works well together.. Well,i just completed the game and it feels like i watched the good movie,sounds are great they just forcing you to look around and be warned.. I would definitely recommend this game! Nice story, and also good atmosphere! The game got me some times, so I can tell the jumpscare are very good. I would recommend bying it when its on sale (I got 90% off). > So all in all a good and short horror game, with a nice atmosphere and a good storyline.
